

Were you hospitalized for COVID-19 during the early pandemic?

Are you a woman aged 42 to 67?

If so, please consider sharing your story in this confidential research study.

ABOUT THE STUDY

This qualitative research study seeks to understand the lived experience of midlife women hospitalized for COVID-19 during the early pandemic. It is hoped that the understanding gained from this study will result in greater clinical support and recommendations for COVID-19 survivors.

ABOUT THE RESEARCHERS

This IRB-approved study is being led by Samantha Aubé under the supervision of Dr. Merle Keitel. Samantha is a Counseling Psychology PhD student at Fordham University and holds a Masters degree in Mental Health Counseling.

WHAT IS INVOLVED?

- Demographics form
- 1 hour Zoom interview (camera on or off)
- \$20 compensation
- Completely confidential

INTERESTED IN PARTICIPATING?
